PROFESSIONAL SUMMARY

BCA graduate with a strong foundation in data analysis, SQL, Python (Pandas), and Power BI, developed through practical, hands-on projects. Proficient in data cleaning, exploratory data analysis, and dashboard development, with a demonstrated ability to translate large, complex datasets into clear, actionable business insights. Committed to leveraging analytical skills and technical proficiency to support data-driven decision-making in a Data Analyst role.

TECHNICAL SKILLS

Programming: Core Python (Pandas),core java
Database: SQL, MySQL
Visualization Tools: Power BI
Tools: Excel (Pivot Table, VLOOKUP, Data Cleaning)
Concepts: Data Cleaning, Data Analysis, KPI, Data Modeling, DAX, ETL basics

EXPERIENCE

Support Analyst | ISERU, Pune |2024 – 2025

- Extracted, cleaned, and validated large datasets using MS Excel to ensure accuracy, consistency, and data integrity across reporting cycles.
- Built Excel-based reports and dashboards to track key performance metrics, enabling data-driven decision-making across teams.
- Maintained documentation for recurring data processes, reducing turnaround time and improving analytical efficiency.
- Collaborated with stakeholders to identify data discrepancies and deliver timely analytical support.

PROJECTS

E-commerce-Return-Sustainability-Analysis-Dashboard

Built an interactive E-commerce Return & Sustainability Dashboard using Power BI, MySQL, Excel, Power Query, and DAX. Analyzed 5,000+ order records to track return trends, revenue loss, return reasons, customer locations, and sustainability metrics through dynamic visualizations and interactive dashboards. <https://github.com/sharvari0519/E-commerce-Return-Sustainability-Analysis-Dashboard.git>

Credit Card Fraud Detection Dashboard | Power BI, MySQL, Excel

Developed an interactive dashboard for 284,807 credit card transactions.

Built KPI cards, slicers, bar, line, donut charts and transaction table. Used SQL, Excel and DAX to derive fraud insights. • [GitHub: https://github.com/sharvari0519/Credit-Card-Fraud-DetectionDashboard](https://github.com/sharvari0519/Credit-Card-Fraud-DetectionDashboard).

Face Recognition Attendance System- Python, OpenCV, Pandas, MySQL

Built an end-to-end automated attendance system using computer vision and machine learning that captures attendance through facial recognition with real-time database synchronization.:

. <https://github.com/sharvari0519/face-recognition-attendance>

Neural Trade AI — Stock Prediction Platform | HTML, CSS, JavaScript, TensorFlow.js

Built an AI-powered stock prediction web app for 55+ NSE/BSE equities with real-time live tick engine. Integrated TensorFlow.js neural network to generate price forecasts with BUY/SELL/HOLD signals and confidence scores
